**DETAILED ACTION**

1. Applicant is required to submit a certified copy of the priority document cited in page 1 of the specification.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Parks et al ("Parks"; USP 5877746) and Finke-Anlauff ("Finke-Ankauff", USP 5479476)

Regarding claims 1 and 8, Parks teaches the creating a user-customized menu in a telephone having a menu table in which service menus for a user are stored in association with corresponding indexes (Fig. 8), the method comprising the steps of upon receipt of a user-customized menu creating key, switching an operating mode of the portable radio telephone to a user-customized menu creating mode (col 9, lines 26-29); receiving a user-customized menu index in the user-customized menu creating mode (col 17, lines 44-46); col 18, lines 14-22); after receiving the user-customized menu index, receiving a menu index to be set as menu contents in the user-customized menu index (col 18, lines 14-22); and after receiving the menu index, storing the menu index in association with the user-customized menu index (col 18, lines 22-26). Parks differs from the claim in that Parks does not teach that menu the customization can be applied for portable radio phone. However, such feature is known

in the art as taught by Finke-Anlauff. Specifically, Finke-Anlauff teaches mobile telephone having groups of user adjustable operating characteristic which comprises the user customization of telephone features from a menu (Fig. 3, col 2, lines 6-13). It would have been obvious to one of ordinary skill in the art, having the teaching of Parks and Finke-Anlauff before him at the time the invention was made, to apply the method for phone menu customization taught by Parks to the mobile phone taught by Finke-Anlauff with the motivation being to enable the user to easily and conveniently customize the mobile phone menu.

Regarding claim 2, Parks teaches that said menu index is a service menu index stored in the menu table (Fig. 8).

Regarding claim 3, Parks teaches the displaying a message for requesting the user to input a desired user-customized menu index after switching the operating mode of the portable radio telephone to the user customized menu creating mode (col 18, lines 54-55).

Regarding claim 4, Parks teaches the displaying a message for requesting the user to input a menu index desired to be input as menu contents in association with the received user-customized menu index (col 18, lines 54-55).

Regarding claim 5, Parks teaches the creating a user-customized menu in a telephone having a menu table in which service menus for a user are stored in association with corresponding indexes (Fig. 8), the method comprising the steps of upon receipt of a user-customized menu creating key, switching an operating mode of the portable radio telephone to a user-customized menu creating mode (col 9, lines 26-29); displaying a message for requesting the user to input a desired

user-customized menu index (col 18, lines 54-55); receiving a user-customized menu index (col 17, lines 44-46; col 18, lines 14-22); displaying a message for requesting the user to input a menu index desired to be input as menu contents to be stored in the received user-customized index (col 18, lines 54-55), after displaying the menu index input request message, receiving a menu index from the user (col 18, lines 14-22); storing the received menu index in association with the user-customized menu index (col 18, lines 22-26). Parks differs from the claim in that Parks does not teach that menu the customization can be applied for portable radio phone. However, such feature is known in the art as taught by Finke-Anlauff. Specifically, Finke-Anlauff teaches mobile telephone having groups of user adjustable operating characteristic which comprises the user customization of telephone features from a menu (Fig. 3, col 2, lines 6-13). It would have been obvious to one of ordinary skill in the art, having the teaching of Parks and Finke-Anlauff before him at the time the invention was made, to apply the method for phone menu customization taught by Parks to the mobile phone taught by Finke-Anlauff with the motivation being to enable the user to easily and conveniently customize the mobile phone menu.

Regarding claim 6, Parks teaches that the menu index is an index of a service menu previously stored in the portable radio telephone (col 17, lines 64-67).

Regarding claims 7 and 9, Parks teaches the releasing the user-customized menu creating mode after storing the menu index in association with the user-customized menu index (col 6, lines 12-15).
